CJ JESSETT

Software Engineer
713-397-4945 | cjessett@gmail.com

PROFESSIONAL SUMMARY

Fullstack Software Engineer with 8+ years of experience building and scaling web applications in health tech. Proven track record shipping impactful features in React, Node.js, TypeScript, and Ruby on Rails — with hands-on experience in HIPAA-compliant systems and cloud infrastructure on AWS. Thrives in collaborative, cross-functional teams with a strong bias for clean code, measurable outcomes, and clear communication with technical and non-technical stakeholders.

WORK EXPERIENCE

Customer Service Technician | Explorist Life MAR 2025 – MAR 2026

- Reduced response time by 30% by building a custom quote survey that auto-summarized customer inputs directly into support chat
- Guided hundreds of customers through designing and purchasing complex camper electrical systems, translating technical specs into practical solutions
- Resolved hundreds of technical support cases covering system troubleshooting and successful hardware installation

Software Engineer | Everlywell SEP 2020 – MAY 2024

- Rebuilt the health test kit registration app in React, cutting completion time by 30% and significantly reducing user drop-off
- Introduced Datadog dashboards and drove team-wide adoption, improving observability and reducing time-to-resolution for production incidents
- Implemented a Contentful content model enabling non-technical stakeholders to manage content independently across multiple platforms

Mentor | Codecademy JAN 2018 – FEB 2020

- Reviewed student projects in React and JavaScript, delivering actionable feedback to improve code quality and understanding
- Mentored cohorts of 60+ students, fostering collaboration and advising on career paths in software engineering

Software Engineer | Moove-it SEP 2016 – FEB 2018

- Built a full-stack React and Node.js app to ingest and normalize patient data from multiple formats into a custom EHR, saving hundreds of manual hours
- Replaced legacy patient management systems with HIPAA-compliant Node.js microservices, improving reliability and data security

Mathematics Tutor | Fort Lewis College DEC 2014 – DEC 2015

- Tutored and mentored students in upper-division mathematics courses including Linear Algebra, Calculus, Differential Equations, Proofs, and Number Theory

EDUCATION

Mathematics | Fort Lewis College, Durango, CO AUG 2014 – DEC 2015

Physics | University of Texas, Austin, TX AUG 2009 – APR 2013

3x All Big 12 in Track

SKILLS

TypeScript	Node.js	Ruby	Rails
React	PostgreSQL	AWS	GitLab

PROJECTS

FarmSignal

App connecting farmers and chefs — farmers update produce availability and an iOS Shortcut sends automated messages directly from their phone. Includes tiered features and a subscription model. Built with Next.js, PostgreSQL, OAuth, and Stripe.

Lapse Rate

Weather forecasting tool for pilots and paragliders using real-time forecast data from Open-Meteo and the NWS.

Narrate

Converts PDF and EPUB files to natural-sounding audio via AI TTS. Supports self-hosted Kokoro, OpenAI TTS, ElevenLabs, and Google Cloud TTS.

Garden Monitor

Full-stack IoT system for monitoring and automating garden irrigation. Built a React front-end and Rails API backed by AWS IoT and EC2, with custom hardware including soldered microcontroller protoboards wired to soil moisture sensors and solenoid valves. Used Arduino for embedded logic and OTA firmware updates.
